

Virtual CISO (vCISO) services for Start-ups (and SMBs).

Building a startup is no easy task. Protection of intellectual property and/or critical assets are essential for sustainable business outcomes. As single breach can have existential consequences. With limited budget and resources, hiring a full-time CISO may not be the most cost-effective option.

CyberMinds' vCISO services are tailor-made to fill this vital need. It is a great solution for small businesses and startups who don't require a full time security position but wish to build Cyber security programs that align with business objectives and show measurable improvements to security posture.

Instead of paying for a full-time CISO, having a few hours a month to guide the company's security program can give you a head-start on compliance, and proactive protection of critical assets which you can then leverage in attracting investors and leads.

Our vCISO include (but not limited to);

1. Current state Security Assessments, Strategy and Road-mapping
2. Documentation of Cybersecurity Policies and Procedures
3. Advise on compliance & privacy mandates and audits
4. Implement Security Frameworks that aligns with your business needs (e.g. NIST, ISO, CIS Top 20 etc.)
5. Assistance on Cyber Insurance Coverage and Third-party risk assessments
6. Technology Evaluation, MSS/Vendor Partner Management
7. Cyber Risk Program Management

Industry

- Finance
- Healthcare
- Tech
- Retail
- Medical Devices
